

Art. 62035

## Diesel Applicator Spray

**Reaction time**  
works during application

**Application field**  
all diesel engines

**Consumption**  
depending on application

**Application interval**  
-

**Application** Spray in intervals into air intake system while engine is running.

**Description** For the cleaning and protection of the entire air intake system of diesel engines. Removes deposits in the air intake system, combustion chamber, throttle valves, inlet and outlet valves and valve seats.

**Benefits** Only a clean fuel system guarantees clean and powerful combustion and efficient engine performance! Reduces the fuel consumption and the exhaust gas emission values. Ensures a smooth idling and powerful and even motor running.

**PU** 12 x 400 ml

**Packing sizes** 400 ml // other sizes available on request
