

Art. 62009

DPF Purifier

**Reaction time**

works during operation

**Application field**

all diesel particulate filters

**Consumption**

300 ml for 60 l petrol // resp. 0,5% of the filling content

**Application interval**

every 5,000 km

Application Add regularly every 5,000 km right before filling up the tank. Sufficient for 60 L of diesel fuel. Product works during operation.

Description GAT DPF Purifier is a high-performance additive for use in all diesel aggregates to reduce soot and exhaust gas emissions and to increase engine performance. Compatible with all diesel engines and suitable for all kind of diesel fuels.

Benefits Only a clean fuel system guarantees optimal operation of all system components, an efficient engine performance and minimum exhaust emissions! Protects the diesel particulate filter and the environment. Reduces soot formation and supports the regeneration of the diesel particulate filter. Enhances storage and corrosion stability of the diesel fuel and acts as defoaming agent. Increases cold start properties. Regular use helps to keep the filter clean and avoids expensive repair works.

PU 24 x 300 ml

Packing sizes 300 ml // other sizes available on request
