

Art. 62036

Petrol Applicator Spray

Reaction time
works during application

Application field
all petrol engines

Consumption
depending on application

Application interval
-

Application Spray in intervals into air intake system while engine is running.

Description For the cleaning and protection of the entire air intake system of petrol engines. Removes deposits in the air intake system, combustion chamber, throttle valves, inlet and outlet valves and valve seats.

Benefits Only a clean fuel system guarantees clean and powerful combustion and efficient engine performance! Reduces the fuel consumption and the exhaust gas emission values. Ensures a smooth idling and powerful and even motor running.

PU 12 x 400 ml

Packing sizes 400 ml // other sizes available on request
