

Art. 62040

## LPG System Clean & Protect

**Reaction time**  
works during operation

**Application field**  
all LPG gas tanks

**Consumption**  
120 ml for 50 l Benzin // 60 ml per 25 l

**Application interval**  
every 3-4 months or every 10,000 km

- Application** Add 1 can (120 ml) every 3-4 months or every 10.000 km to the gas tank before filling up. Recommended for all vehicles with bivalent engines. 120 ml sufficient for 50 L of fuel. Product works during operation.
- Description** This high-performance product has especially been developed for liquefied petroleum gas (LPG) powered vehicles. The product protects the complete gas system against corrosion and ensures optimal protection against valve impact. It absorbs harmful moisture and effectively prevents the formation of combustion residues.
- Benefits** Long-term protection of valves and valve seats. Optimized fuel consumption and reduced exhaust gas emission. Extends the life span of the engine.
- PU** 24 x 120 ml
- Packing sizes** 120 ml // other sizes available on request

Although our information is based on intense product tests and studying and therefore considered as reliable, it nevertheless has solely advisory character.
